

# A SUCCESS STORY

The history of the Moroccan Aerospace industry dates back to the 1950's with expertise being developed in the field of aircraft maintenance for civil and military aviation. In 1951 Airbus created Maroc Aviation subsidiary, operating at this time in the military business with Morocco, and became in 1993 a Sogerma plant developing new activities in the manufacturing of seats, harnesses and metallic assembly of parts. The creation of Royal Air Maroc in 1957, Airbus created Maroc Aviation considered today among the major regional airline companies in Africa, has fostered the trend of developing MRO capabilities for its own fleet. In 1999, Royal Air Maroc and Snecma Safran Group created a Joint Venture – SMES - for engine maintenance and repair, which confirmed Morocco's capacity to develop know-how in this field, with qualified and certified technicians. This first plant of Safran Group in Morocco was just a start to the Group's development in the Kingdom, with 8 subsidaires today employing 3280 people: Safran Nacelles Morocco, Safran Aerosystems Morocco, Safran Electronics & Defense Morocco, Safran Electrical Power Morocco, Safran Engineering Maroc, Matis Aero (JV of Boeing & Safran Electrical Power), Safran aircraft Engine Services Morocco and Safran Maroc. The first "typical" French SME operating in precision machining called Le Piston Français (SERMP), wich is today a leader in precision machining field with merely 200 employees.

Since then, more and more companies started setting up their business in Morocco. From 2000 to 2022 more than 140 companies operating in aerospace industry established themselves in Morocco, employing 20 000 qualified employees. The trend was fostered with a dedicated industrial zone, The Aeropole - next to Casablanca International Airport which belongs to ONDA - the National Airports Organization. The availability of land for companies, and relatively at affordable price, was key to the attractiveness of Morocco for foreign investors. During this period of time, Safran Group played a key role in the booming of aerospace industry in the country because it set up a business in major fields of aerospace industry, helping the development of a diversified and more integrated supply chain and attracting Tier 2 and Tier 3 suppliers. Other major actors have played a key role in the development of the supply chain besides Safran Group and Airbus Atlantic.

Tier 1 suppliers such as Daher Aerospace, Thales, Spirit Aerosystems, Collins Aerospace, Hexcel Composites, Eaton, Howmet Fixations, AD Industries, Mecachrome Group Hexcel and well referenced SME's in aerospace industry have consolidated even more the aerospace industry.

## THE PRESIDENT'S

## WORD

Mr. Saïd Benahajjou Chairman Of GIMAS

Twenty years were marked by a human and technological adventure and technological adventure, which positions Morocco among the most competitive and attractive destinations in the world-map of aeronautical industry, and confirms the ambition of the kingdom in This highly value-added sector.

Morocco has reached the maturity level required to take a stronger position in this industry and not miss the opportunities favored by a good trend in the aviation sector. The contract signed between the Moroccan Kingdom and Boeing confirms the unique potential of the country. GIMAS, in partnership with the government, works on the development of the Supply Chain for more integration of know-how with higher added-value.

The quality of human resources, the training capabilities, the proximity of Morocco to Europe at only 14 km, the commitment of the State to support this industry, and the consolidated supply chain with existing 140 companies, contribute to set up Morocco as the place to be.

20 YEARS

# Missions of GIMAS

Consolidate and reinforce Morocco's aerospace industry competitiveness and constribute to its global exposure.

Federate, represent and defend Moroccan companies' interests on public and private, national and international spheres.

Represent its membres in national and international airshows - Le Bourget, Farnborough, Aerospacemeetings casablanca,etc

Meet the industry's needs in trained work force with the development of IMA Moroccan Aerospaceintitute.

Integrate Reseach & Developement in the national aerospace strategy through partnerships with universities and research centers, within a AMC – Aerospace Moroccan Cluster

Because the quality of the human resources and the innovation are the basis of the development and the long-lasting competitiveness of the aircraft industry To meet your needs, our offer of training:

### QUALIFYING TRAINING FOR EMPLOYMENT

- · Assembly of parts and subparts
- · Sheet metal working
- · Composites materials
- · Electrical systems, electronics and wiring
- · Machining and tooling
- · Paint, Welding, Electronics

#### THE IMA IN FIGURES

20 Trainers
14 000 People trained since 2011
7000 square meters
distributed in 25 classrooms
and 2 workshops

### ON GOING TRAINING FOR COMPANY EMPLOYEES

- · Management training courses : Team Leaders, Supervisors
- · Human development, Human factors,
- · Skill Improvement, IPC certification, Metrology
- · Methods, Quality, Security, Electrical qualifications, First-aid
- $\cdot$  Office automation (Word, Excel, ...), French language,  $\dots$

AN INNOVATIVE PARTNERSHIP
BETWEEN MOROCCAN STATE AND GIMAS

CTPC	The CTPC, Technical Center of Plastics and Rubber is an association, founded in 2005 by the Ministry of Industry and the Industrialists of the Plastics sector represented by the Moroccan Federation of Plastics (FMP), with the objective of strengthen the development and the technological integration of industrial companies of the plastics industry. The CTPC is located within Moroccan Industrial Technical Centers facility which includes different CTIs, each specialized in a specific field. In order to take advantage of their synergies they work under the Moroccan Industrial Technical Centers Network (RECTIM).  Area of expertise: The CTPC operates in the area of plastics, rubber and composites; Strategic segments: The CTPC is mainly positioned on 7 strategic areas of activity: BTP, PACKAGING, AGRICULTURE, AUTOMOTIVE, AERONAUTICS, MEDICAL AND RECYCLING. VALUE PROPOSITION:The CTPC is organized as a structure of competences and services specialized in plastics, rubber and composites:  • Testing & Analysis: "Services throughout the life cycle of polymer products"; Product Certification: "A certification mark at the service of the quality of the sector"; Training: "We promote professional excellence in the sector; Technical Assistance & Expertise: "More than a service provider, a trusted technological partner «; R&D, Innovation: "Innovative solutions for the field of plastics, rubber and composites";	Complexe des Centres Techniques Industriels Marocains – Route Ouled Haddou Boulevard 60, Sidi Maârouf 20280 - Casablanca - Maroc	Phone: +212 (0) 5 22 58 09 50 /77 Fax: +212 (0) 5 22 58 05 31	elyakouti@ctpc.ma www.ctpc.ma

INSTITUT DE SOUDURE MAROC	Presentation of Institut de Soudure Group - Your Trusted Partner in the Aerospace Sector For over a century, Institut de Soudure Group has been recognized for its expertise in the aerospace industry. Our strategic presence in Morocco since 2006, along with the qualification and certification of our personnel as AFENDA FrANDTB level 2 and 3, make IS Maroc your trusted partner for all your quality control requirements.  Our mission is to support you in risk management and ensure the quality of your aerospace products. With our highly skilled team and state-of-the-art equipment, we conduct in-depth inspections and rigorous quality controls in compliance with the industry's strictest standards.  We also offer tailored training programs for your personnel. Whether it's strengthening their technical skills in manufacturing and assembly processes or providing training on the latest technological advancements, we are here to support their professional development.  Optimizing assembly processes for metallic and composite alloys is another key expertise we offer. With our technical know-how and constant commitment to innovation, we help you improve the efficiency, quality, and reliability of your assembly processes, delivering top-notch aerospace products.  As an EASA PART 145 approved organization, we are authorized to perform maintenance operations in compliance with international regulations. This ensures the availability, safety, and reliability of your aerospace equipment throughout its lifecycle.  Choosing Institut de Soudure Group means selecting a trusted partner that combines technical expertise, innovation, and a commitment to quality. We are ready to take on the challenges of the aerospace industry with you and support you in realizing your most ambitious projects.
